The Teachers and Graduates
of the
New London High School
Shandon, Ohio

1920

A Review of the Years

If we could live life over again we believe that we would look forward with intense pleasure to the privilege of once more experiencing the joys of school days. To those of us whose lot is cast in close touch with the school of which we were at one time an active part, items of interest in its history are a part of our knowledge but to those who have left its portals and have scattered far and wide many of these same items would be news of progress made. Trusting that this may contain some such items for each one that it reaches we present this little register in the hope that it may intensify our loyalty to the school where a few, or perhaps many, years ago we played and worked.

The first commencement exercises of this school were held in 1892 and since that time twenty-nine classes have been graduated with a total membership of one hundred and fifty seven, nine of whom are now dead. In 1908 Class Night exercises were made a feature of the commencement week program and each succeeding year these exercises furnish a very enjoyable part of the closing events.

The school was originally chartered as one of the third grade and was operated as such until Jan. 31, 1916.

In September 1915 one full year's work was added to the High School course thus raising its standard to a High School of the Second Grade and a charter to this effect was issued Jan. 31, 1916. As a result of this progression, the fourth room of the building was fully equipped and an additional teacher was employed who was to assume part of the grade work and part of the high school work. This has made it possible to hold our pupils one year longer and to accomplish more of their high school work at home..

In 1915 we passed under county and district supervision as established by the adoption of the new school code by the state legislature and shortly after the text books recommended by the county officials were adopted for the grades by the local school authorities.

As the result of a plan set on foot by the High School Alumni Association, about three hundred and fifty volumes were recently added to the library through the generosity of alumni, patrons and friends of the

school. We now have at our disposal about sixteen hundred volumes, a most unusual and valuable equipment for a rural school.

Music, although at present not taught in the school, is emphasized and encouraged, and literary and musical programs are given by the pupils at intervals during the school year—

Nature Study Clubs, Household Science Clubs, and Sewing Clubs have been organized at various times under competent leadership and these Clubs have done much efficient and commendable work.

The very loyal and practically undivided support which has been given to the school by the various members of its boards of education and by its patrons has done much toward what ever success has been attained by the teachers and pupils.

We are justly proud of the records made by our alumni in the various vocations of life and that record will be an inspiration to those of us who labor on preparing ourselves for some useful and helpful service along the way of life.

As graduates of this school come back to us as often as you can and as we revive memories of happy school days now past we will also mutually pledge ourselves to a more efficient service in the days that are yet to be.

S. M. ROWLAND, '92.
